2024 Seasonal Migrant Agricultural Workers Population Report**

2024 Seasonal Migrant Agricultural Workers (including H-2A Workers) in Wisconsin

Wis. Stat. 103.90-103.97 provides protections for migrant workers who temporarily leave their principal out-of-state residence and come to Wisconsin for not more than 10 months in a year to accept seasonal employment in agriculture, horticulture, or food processing.

The Migrant Population Report reflects the number of migrant seasonal workers and H-2A visa holders as reported by employers. Not all employers of migrant workers responded to the survey. The data provided has not been verified by the department. A black space indicates a lack of response from the employer.

**Non-workers are non-working family members of migrant seasonal farmworkers as reported by employers. The non-worker population does not represent the total number of non-workers in the state. Employers have reported that the number provided is an estimate.

^H-2A workers are temporary, nonimmigrant workers who are provided a visa to perform agricultural labor or services of a temporary or seasonal nature. Employers obtained certification from the U.S. Department of Labor (DOL) after they demonstrated there were insufficient qualified U.S. workers available and willing to perform the work at wages that meet or exceed the prevailing wage paid for that occupation in the area of intended employment.

This number is the number of H-2A workers who were used by the employer by hiring them directly or through a migrant labor contractor.

^^This number reflects the number of H-2A workers that was approved by the DOL.

The data provided in this report is a record of the department's outreach and enforcement activities and does not purport to provide comprehensive data about the migrant farmworkers in Wisconsin.
